EDUCATION

University of Michigan - Dearborn
Bachelor's, Computer Science

PROFESSIONAL EXPERIENCE

Tegrit

December 2021 - Present

Software Engineer

Livonia, MI

- Engineered an EDRO retirement workflow using C# and .NET Core, enhancing user experience and reducing processing time by 50% within 3 months through full-stack development and end-to-end ownership.
- Designed and implemented a Batch Calculator tool in C# and .NET Core, enabling users to upload and create multiple accounts via CSV files, boosting productivity by 65% and enhancing communication skills among teams.
- Executed a lift-and-shift of on-prem file storage to Azure Blob Storage, orchestrated nightly data processing with Azure Functions, and established comprehensive CI/CD pipelines in Azure DevOps for seamless end-to-end integration.
- Transformed VB.NET WinForms applications, significantly improving user experience and operational efficiency across multiple teams within 6 months through collaborative full-stack modernization and effective communication.

Computer Enterprises Inc

October 2020 - November 2021

Software Engineer

Remote

- Boosted software application performance by 30% within 4 months through cross-functional collaboration, enhancing scalability and user satisfaction while leveraging strong written and verbal communication skills.
- Engineered and deployed a RESTful API utilizing C#, .NET, and Postgres for user authentication and transaction management, achieving a 30% reduction in response times and significantly improving system scalability.
- Created an inventory management tool with .NET and MySQL, optimizing stock tracking processes and driving user engagement within 4 months, demonstrating effective verbal communication throughout the project.

Shoptelligence

August 2019 - October 2020

Software Engineer

Ann Arbor, MI, USA

- Executed rigorous integration testing across diverse environments, enhancing system reliability and achieving a 60% reduction in deployment issues within 6 months using CI/CD practices.
- Engineered robust Python-based integrations to unify platform services, significantly boosting interoperability and decreasing cross-service failures by 35% in a Django environment.
- Developed scalable Python APIs utilizing FastAPI, cutting latency by 40% while efficiently managing over 1M daily requests across microservices, leveraging Heroku for deployment.
- Optimized database query performance through strategic ORM refactoring and index implementation, reducing API response times from 800ms to under 200ms and tripling throughput, while employing Git for version control.

SKILLS

Skills: C#, Microsoft Azure, SQL, MySQL, Python, FastAPI, REST APIs, Agile, AngularJS, AWS, Data Structures & Algorithms, Google Cloud Platform, JavaScript, jQuery, PHP, Oracle, React.js, RDBMS, DevOps, Software Testing, React, JS
